

Louisburgh Locality Repair Directory

The repair directory aims at promoting the repair of household items rather than trashing them, therefore encouraging people to reduce consumption and waste and to be kinder to the earth.

This directory was created by Climate Action Louisburgh Locality. **1st edition, July 2023.**

Louisburgh Locality Repair Directory

The global economy consumes 100 billion tonnes of materials a year, but we only cycle 8.6% of what we use. We need to do better if we want to save our planet and its resources, and buying less and repairing what we have can help.

This directory encourages our community to repair and reuse locally as a method for reducing waste and petrol, while saving money and contributing to the local economy.

The directory was created by Climate Action Louisburgh Locality (CALL), a not-for-profit environmental group rooted in co. Mayo, Ireland. Currently this directory covers businesses and individuals spread from Inishturk and Clare Island in the West to just outside Westport in the East, encompassing the villages of Killeen, Louisburgh, Lecanvey and Murrisk.

We encourage reusing and repairing but we do not advocate or endorse any business listed.

The first edition of this Repair Directory is just a spark. We hope that with this initiative we will have more people joining the directory soon. We are very grateful to all the businesses and individuals that put themselves forward to contribute to this directory. Thanks for keeping the old art of repairing alive.

If you would like your business to be included in the next edition, or if your business is listed and you want to edit your details, please email us at lkci.call@gmail.com
